

Administering Medications to Students

School personnel shall not administer prescription or nonprescription medications to students unless appropriate administration cannot reasonably be accomplished outside of school hours and the student's parent/guardian is not available to administer the medication during the school day.

Medication may be administered to students by school personnel whom a registered nurse has trained and delegated the task of administering such medication. For purposes of this policy, the term "medication" includes both prescription medication and nonprescription medication, but does not include medical marijuana.

The administration of medical marijuana shall be in accordance with state law regarding the administration of medical marijuana to qualified students.

The term "nonprescription medication" includes but is not limited to over-the-counter medications, homeopathic and herbal medications, vitamins and nutritional supplements.

Medication may be administered to students by the school nurse or other school designee only when the following requirements are met:

1. Medication shall be in the original properly labeled container. If it is a prescription medication, the following shall be printed on the container:
 - a. Student's name
 - b. Date of birth
 - b. Name of medication
 - c. Dosage
 - d. Purpose of the medication
 - e. Time of day medication is to be given
 - f. Anticipated number of days it needs to be given at school
 - g. Possible side effects
2. The school shall have received written permission to administer the medication from the student's health care practitioner with prescriptive authority under Colorado law.
3. The school shall have received written permission from the student's parent/guardian to administer the medication to the student according to policy JLCD-E.
4. The parent/guardian shall be responsible for providing all medication to be administered to the student, with the exception of acetaminophen, Bacitracin and calamine lotion per physician approved Over the Counter Medication Protocol. Administration of medications shall be in accordance with regulation JLCD-R.

Self-administration of medication for asthma, allergies or anaphylaxis

A student with asthma, a food allergy, other severe allergies, or a related, life-threatening condition may possess and self-administer medication to treat the student's asthma, food or other allergy, anaphylaxis or related, life-threatening condition. Self-administration of such medication may occur during school hours, at school-sponsored activities, or while in transit to and from school or a school-sponsored activity. Student possession and self-administration of such medication shall be in accordance with regulation JLCD-R.

Authorization for a student to possess and self-administer medication to treat the student's asthma, food or other allergy, anaphylaxis or other related, life-threatening condition may be limited or revoked by the school principal after consultation with the school nurse and the student's parent/guardian if the student demonstrates an inability to responsibly possess and self-administer such medication.
